

Due Diligence and Compliance Services

ABOUT WIDELITY

Widely is a professional services and business consulting company that provides a full spectrum of services to its clients.

OUR COMMITMENT

Our customers come first, as we are focused on delivering value and quality service to our customers in the design and deployment of technologies that meet the needs and requirements of today's changing business environment. We pride ourselves in designing solutions that not only support today's demands, but that also accommodate future demands as our customers grow their business.

Communications Networks, Facilities

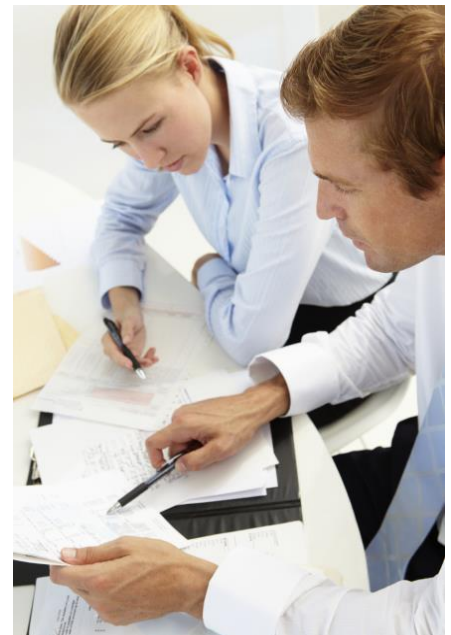

- Widely provides a full service offering of operational due diligence support and analysis.
- Widely provides telecommunications sector services for, financial institutions, investors, buyers, sellers, and their professional advisors. Our financial and due diligence services help answer questions and allow informed decisions to be made.
- We perform a wide range of due diligence and compliance reviews with our skilled technicians, construction managers, management consultants, and subject matter experts in finance, telecommunications, network design, and infrastructure.

Communications networks around the world must respond to increased service demands spurred by new technology. Business strategy must keep pace driving infrastructure turnover in delivering appealing new services to maintain the existing and increase the new customer bases.

Widely team members are skilled at all aspects of analyzing the condition of the wireless networks, operations & service management, business models and the competitive and regulatory environment.

Organizations expecting to invest in or acquire a telecommunications network, services, or facilities, need to have an excellent understanding of the commercial, regulatory, physical status, and technical environments.

PROCESS

- Baseline and Gap Analysis
- Documentation Review
- Employee Interviews
- Site visits & Site Surveys
- Performance Measurements
- Technology, Performance Roadmap
- Benchmarks Against Best in Class
- Contingency Plans
- Vendor Profiles
- Performance Metrics

Telecommunications organizations around the world are changing quickly. Business models are evolving, technology is advancing, and infrastructure is in need of constant upgrade, repair and replacement. They are also facing mandatory compliance with escalating federal, state, and local regulatory requirements.

Companies seeking growth and acquisition opportunities need a reliable team that can accurately identify, define, and align the target opportunity with their business goals.

Our process addresses the unique dynamics, risks, and complexities of each transaction along with the operational implications.

Our hands-on teams of engineering, management and construction professionals can provide a complete suite of project engineering, management for major market directing Microwave Engineering, Construction, and Site Acquisition for design and deployment of microwave paths.
